Ventilation/exhaust-fan set to control fume extraction hood

! Safe protection from carbon monoxide poisoning

+ Flush mount relay

+ Window switch

✓ **Operation compliant with §4 of the German fire protection regulation**

✓ **Wireless or cable connection**

✓ **Professional, unobstrusive installation - no adapters needed!**

The air extraction hood is only released when a window is opened - which ensures that ventilation is optimal.
This prevent the poisonous smoke from the air in the room with the fire source being "sucked in" (and entering the living space).

QR-Info

Radio connection set: ZAS F

FV2 E (flush-mount relay) + FV2 SM (window contact-radio transmitter) for monitoring one window
Monitoring several windows requires a combination of one FV2 EL and up to four FV2 SM contacts

Cable set: ZAS K2

ATR U2 (flush-mount relay) + MKW 1 (Window contact) for monitoring one window
To monitor several windows, simply switch other MKW1 contacts in parallel
